

11 controlling the dough making apparatus with the process control unit to
 12 sequentially deliver said mixture of ingredients to a baking station for a predetermined
 13 time to produce the grain based baked product; and
 14 delivering the grain based product to the consumer.

1 16. (New) The method of claim 15, wherein said electronic interface includes a
 2 telephonic interface for receiving customer input from a telephone.

1 17. (New) The method of claim 15, after said providing step further comprising
 2 the step of:
 3 entering an order with a remote computer through said electronic interface.

1 18. (New) The method of claim 15, wherein the receiving step further
 2 comprises receiving and storing a time for delivery of the desired quantity of food
 3 products.

1 19. (New) The method of claim 15, wherein said initiating step includes
 2 determining a start time for initiating the dough making apparatus which is a
 3 predetermined period of time before the time for delivery such that the food products are
 4 produced fresh for delivery at the time for delivery.

REMARKS

The Examiner has made a restriction requirement between Invention I, claims 1-11 and Invention II, claims 12-14. Applicant hereby elects to prosecute the claims of Invention I, claims 1-11 drawn to a process for production of baked food product. Applicant is submitting additional claims 15-19, also drawn to the method. It is, respectfully, submitted that these claims are drawn to the same invention as set forth in claims 1-11.

If the Examiner has any questions regarding this application, Applicant's attorney may be reached at (248) 647-6000.
